

Product Description

Shadowless Light Bulb

LED corn shadowless bulb is divided into single-color temperature LED lamps and three-color temperature LED lamps. The three-color LED chips are controlled in groups such as alternating white and warm white, and combined with multi-angle illumination design, even if part of the light source is blocked, the mixed light can still cover the shadow area, achieving a "true shadowless" effect.

Advantage

- Beam angle 360°

Best corn led light bulbs typically feature a cylindrical PCB design. Their entire surface is densely covered with LED beads, enabling 360-degree light distribution. This delivers uniform illumination without dark zones.

- Good heat dissipation

LED corn shadowless bulb uses a PC cover + aluminum housing, it has a good heat dissipation effect. Among them, the heat dissipation holes optimize the heat dissipation effect of the lamp, making its lifespan longer..

- Tricolor

Shadowless corn style led bulbs can be made in a single color temperature, such as 3000K, 4000K or 6500k, and they also can be made in a three-color temperature adjustable. They are covered with 3000K and 6500K LED chips and can switch between three color temperatures.

- Eco-friendly

Corn style led bulbs has no ultraviolet or infrared radiation, generates no heat, causes no pollution, and can be recycled after being discarded.

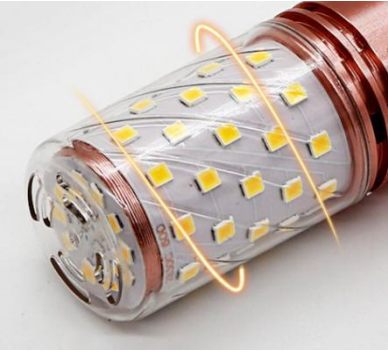

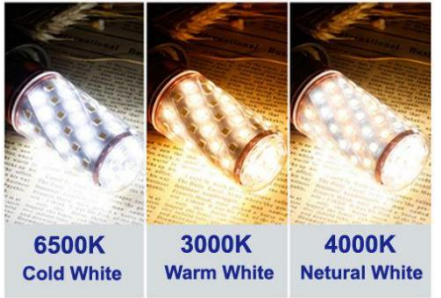

- Long lifespan

The service life of LED corn shadowless bulb can reach 15,000 hours, which is more than ten times that of traditional light sources, reducing the frequency of bulb replacement and maintenance costs.

- Easy to install

It can be directly installed on the lamp socket that matches E14/E27/B22, and replace traditional halogen lamp/incandescent lamp easily.

Shadowless Light Bulb

		
Beam agnle 360°	Aluminum Radiator with Hole	Tricolor Effect

Feature

- ✓ Beam angle 360 degree
- ✓ Eco-friendly
- ✓ Long lifetime
- ✓ Tricolor or single color
- ✓ Good heat dissipation
- ✓ Easy to install, E27/E14/B22 base

Applicationn

Best corn led light bulbs are suitable for indoor lighting and decorative lighting. For example, the living room, bedroom, library, dining room, coffee shop, etc
