Todaybulb

Product Description

Zigbee smart LED bulb

Zigbee smart LED bulb is a specialized light bulb that combines LED technology with Zigbee wireless communication protocol. Unlike Bluetooth or WiFi bulbs, Zigbee smart light bulbs require a hub or gateway(such as Amazon Echo with Zigbee support, Philips Hue Bridge) to connect and operate with each other devices. It is suitable for large homes or setups with multiple smart devices to enable users to control lighting remotely and automate schedules in an integrated smart lighting system.

Advantage

- Wireless control

Todaybulb's Zigbee smart light bulbs use Zigbee protocol via Zigbee hub to connect and communicate within a smart home network.

- Remote control

Todaybulb's Zigbee GU10 bulbs remotely control via smartphone app or voice assistant (Amazon Alexa, Google Assistant and so on)

- Timer & Scheduling

Todaybulb's Zigbee GU10 bulbs can set timers, routines, and scenes to meet various need in different scenarios.

- Dimming

Todaybulb's Zigbee E27 bulb support dimming and adjustment of CCT 2700K-6500k and million of RGB colors to set mood or match your decor.

- Energy efficiency

Todaybulb's Zigbee E27 bulb is running in low power consumption and long lifespan, due to advanced LED technology.

- No WiFi required

Todaybulb's Zigbee color light bulb doesn't require WiFi network, it mainly operates and communicates with each other via a special hub with Zigbee protocol.

Light dance to music

Feature

- ✓ Zigbee hub/bridge connection
- ✓ RGB colors changing & CCT dimming
- ✓ Music sync
- ✓ Phone App & voice control
- ✓ Timer & Scene creation
- ✓ No WiFi network required

Application

Zigbee color light bulb is a smart light bulb that utilizes Zigbee wireless protocol to connect with Zigbee hub or bridge, allowing for remote control, automation, and integration with other smart devices. It is often in pendant light, table lamp, and ceiling light for residential, commercial, and industrial settings.

Residential Areas

- Voice & App control: RGB Zigbee bulb works with voice assistant Amazon Alex, Google Assistant and phone App, to control multiple bulbs simply and high efficiently.
- Schedule & timer: RGB Zigbee bulb sets lighting schedules for waking up, sleeping, or security when away.

Commercial Spaces

- Retail store: Zigbee smart lamp adjusts brightness and color temperature to match environment or promotional themes.
- Hotel: Zigbee smart lamp integrates with room management systems for automatic control.

Industrial use

- Automated scheduling: Zigbee smart light bulbs are in the charge of controlling in large spaces based on setting.
- Remote access: Zigbee smart light bulbs are under management across multiple facilities from a single device.
